

JEREMY M. MATOSKY, P.E., CPESC

President

Mr. Matosky purchased the firm from Richard Trudell in 2004 and assumed overall responsibility for all services, staff, and projects. He also manages projects and provides engineering design and technical expertise while overseeing the daily operations, administration and finances. Jeremy coordinates with clients, interacts with regulatory agencies, provides expert testimony and attends public hearings. His skills include:

Skills Summary

- **Project Management** – Oversees all aspects of industrial, commercial and residential development projects.
- **Administrative** – Develops company manuals and procedures, oversees accounting, marketing and tax matters, provides employee benefit programs and periodic reviews.
- **Permit Acquisition** – Local and state approvals including Act 250, subdivisions, zoning, indirect source air pollution, wastewater and water supply, wetlands and stormwater.
- **Site Planning & Engineering Design** – Roadways, parking facilities, commercial/retail facilities, industrial parks, earth extraction projects and residential development projects.
- **Sanitary Engineering** – Design and analysis of on-site wastewater disposal systems as well as gravity and pressure sewers. Residential, commercial and municipal pump station design.
- **Stormwater Management / Erosion and Sediment Control** – Design of various stormwater systems including open channels, closed pipe systems, detention facilities, best management practices, hydraulic analysis and hydrologic computer modeling. Design, analysis and field inspections / certifications for erosion and sediment control facilities.
- **Transportation Engineering** – Preparation of traffic impact studies for commercial and residential developments, scoping studies for roadway improvements, traffic analysis and geometric improvement design.
- **Construction Phase Services** – Prepares addendums, shop drawing reviews, contractor/owner coordination, performs field observation, oversees site meetings, and performs cost estimating for projects.

Work History

Prior to joining Truell Consulting Engineers in 1999, Mr. Matosky worked as a Project Engineer for a variety of engineering, survey and design firms including Sasaki Associates, Hancock Engineering Associates, and Goldsmith, Prest and Ringwall, Inc., in Massachusetts. He has extensive design and project experience on site related private, public, institutional and international projects.

Professional Registrations & Affiliations

- Professional Engineer – State of Vermont (compliant with ANR's Designer License)
- American Society of Civil Engineers
- International Erosion Control Association
- Certified Professional in Erosion and Sediment Control

Education

- **B.S. Civil Engineering** – University of Vermont, Burlington, Vermont
- **A.S. Civil Engineering** – Springfield Technical College, Springfield, MA
